

食品级视镜管

Food grade mirror tube

FT20

适用流体类型

外观：
内外壁光滑
smooth inner and outer walls

材质结构:

内管：食品级透明硅胶管或四氟管
外层：套用不锈钢网格

Material structure:

Inner tube: food grade transparent silicone tube or PTFE tube
Outer layer: stainless steel grid

尺寸规格:

内径：Ø13mm---102mm (支持定制)
标准长度：依现场情况定制
工作温度范围：-60°C / +220°C

Dimensions:

Internal diameter: Ø13mm---102mm(Support customization)
Standard length: Customized according to site conditions
Length operating temperature range: -60°C / +220°C

产品特点优势

产品应用:

适用于需要对输送材料进行目视检查的场合。它可以在线安装，可以方便地查看管内产品情况。由于内管采用食品级半透明耐高温的硅胶或铁氟龙，所以应用范围非常广，不仅可以应用于食品和制药行业，许多化学和腐蚀性产品也可使用。这使该产品结实耐用，寿命极长。

Product application:

It is applicable to the occasions where visual inspection is required for the transported materials. It can be installed online and can easily view the products in the tube. As the inner tube is made of food grade translucent high temperature resistant silica gel or Teflon, it is widely used, not only in the food and pharmaceutical industry, but also in many chemical and corrosive products. This makes the product durable and has a very long life.
